PROFESSIONAL SUMMARY

Creative full stack developer specialising in web design.
Main areas of expertise are Javascript, ReactJS and NodeJS.

TECH STACK

HTML	CSS
JAVASCRIPT	REACTJS
NODEJS	RUBY

DEVELOPER AT ORBMAPS OCT 2018 - PRESENT

Orbmaps is a research and reporting app aimed at the realestate market. In a small team of 3 I worked on the main website using my ReactJS knowledge to edit the UI of the website.

INTERN AT Q1 DESIGNS FEB - APR 2018

Q1 designs is a digital marketing and custom software house. My internship consisted of working in a team of 4 on a variety of projects for their many clients while reporting to the head software engineer.

NOTABLE PROJECTS Payment platform

I was handed the responsibility of building Q1s new payment platform using Ruby on Rails. I utilised stripe due to its flexibility, popularity and documentation. I also integrated devise for authentication purposes. While still in its infancy stages I was successful in getting the basic functionality working such as creating new clients, successfully billing them and the ability to edit newly created and already existing accounts

Client website redesign

Another project I was involved in was the redesign of Q1s . My main goal was to improve the all round user experience by utilising basic HTML and CSS principals of positioning/displaying items as well as adding additional functionality, such as adding features to the navigation bar and moving images around the page.

Adding a search filter for a client website

Construction of one of their clients websites was underway and a search filtering system needed to be implemented. It needed the ability to pull results based on property prices and certain locations. Using reactJS I added functionality that retrieved the elements containing the desired data for the search function.

COMMERCIAL EXPERIENCE

RPM GLOBAL JUN 2015 - JUN 2017

Support consultant

RPM global is a company that provides a wide variety of software products for the mining industry. My role was to provide level 1, 2 & 3 support to customers all around the world as well as reproducing bugs and forwarding them onto the development team. My role was also to provide training to new clients on our products.

DOWNERDI JAN 2015 - JUN 2015

Support officer

My role at Downer was to provide level 1 & 2 support for clients using Otracom. I was responsible for acknowledging and updating tickets on our ticketing system which included both JIRA and Zendesk. I also assisted in the redevelopment of Otracom by undertaking product testing and reporting.

PREVIOUS EXPERIENCE

DOWNERDI NOV 2012 - DEC 2013

Tyre Maintenance

My first role at Downer was being part of the tyre maintenance personnel. My responsibilities were changing of earth moving tyres, regular checkups and reporting on the condition of each earth-movers tyre. I was also responsible for tyre data entry into Otracom.

EDUCATION

DIPLOMA OF IT
